

# One Drive Default Settings

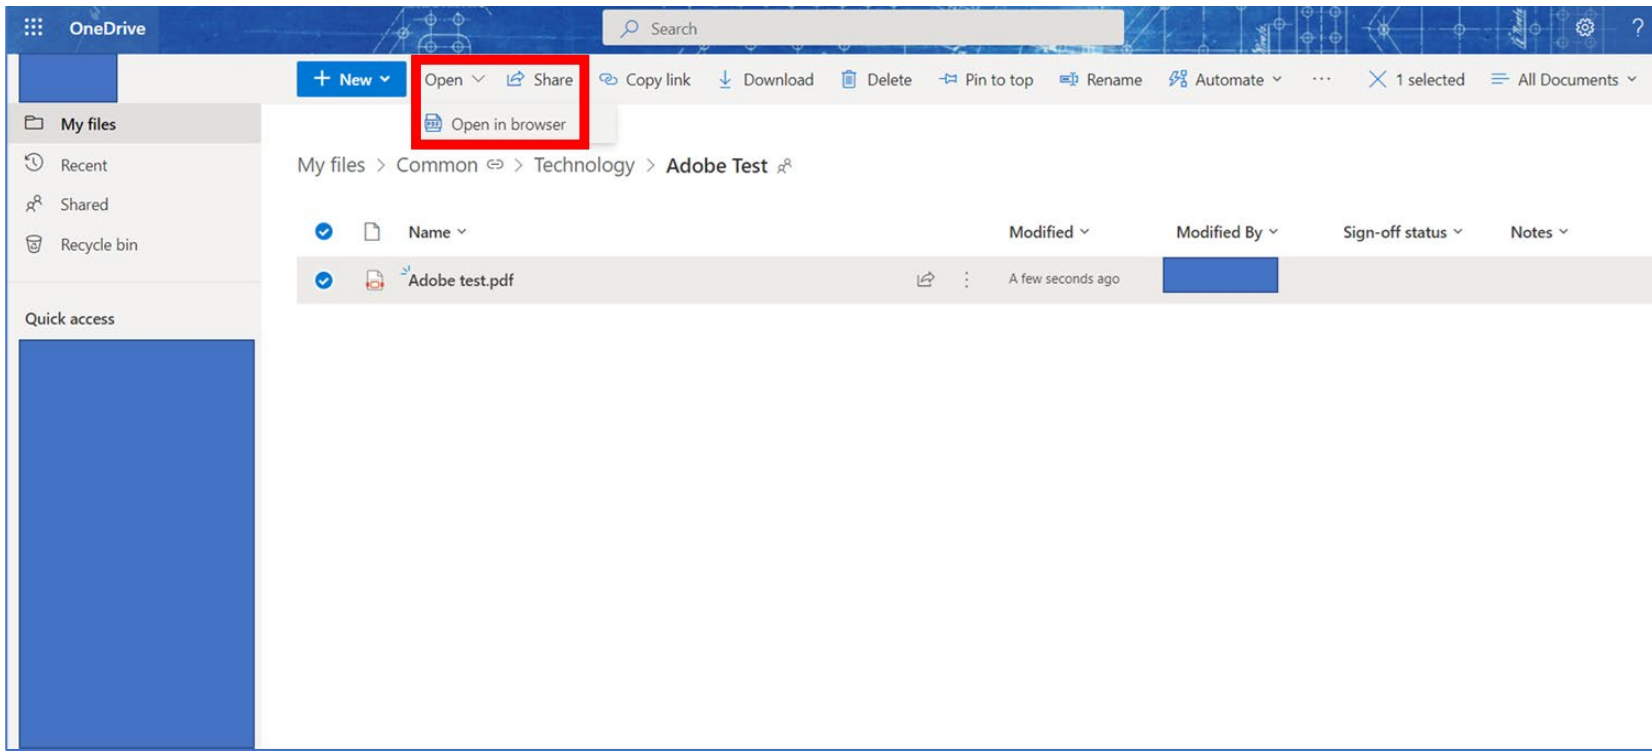

## Opening Documents in the Browser

Specify whether browser-enabled documents should be opened in the client or browser by default when a user clicks on them. If the client application is unavailable, the document will always be opened in the browser.

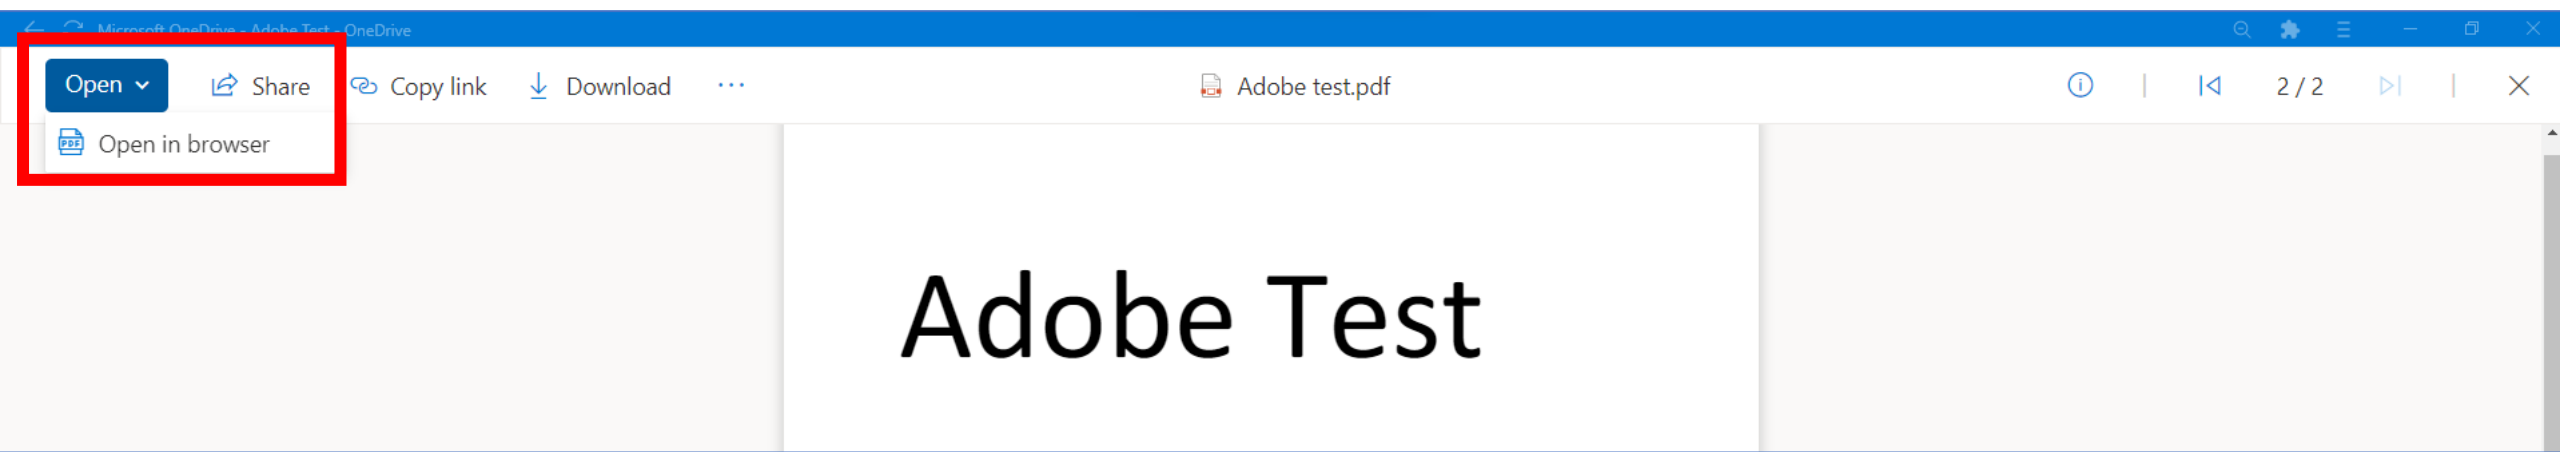

Default open behavior for browser-enabled documents:

- Open in the client application
- Open in the browser
- Use the server default (Open in the browser)

Can't open directly in desktop Acrobat client – only option is through browser

First must go through OneDrive "preview" screen. Then select open in browser "again."

Finally opens PDF in browser. Must have Acrobat browser extension enabled to get the option to open in desktop app.
