Sandbox:
Word tables: 365 with Acrobat PDF Maker 21 (Library 21.7.<mark>123</mark>)

9/20/2021

Bevi Chagnon | PubCom.com

pubcom.com

Unnecessary visual rules, borders, and shading are not artifacted by PDF Maker. No one who uses a screen reader, dyslexia software, or other text-to-speech tool wants to hear this useless decorative stuff. Plus, these voiced "artifacts" violate the PDF/UA-1 and WCAG 2.1 accessibility standards.

Sample table

Cell borders and shading are tagged as <P>PathPathPathPath…

Col 1	Col 2	Col 3	Col 4
Blue	1	3	5
Red	5	7	9

## Sample hyperlink.

- Underline should be artifacted, not "Path"

Visit www.Adobe.com.

Sample text box

- Borders and shading should be artifacted, not <Figure> and "Path Path" (seen in the Content pane).

This is a sample text box in an MW Word 365 document.

The borders and shading on the **next subhead** should also be artifacted.

Missing Alt-Text on graphics

See PubCom logo above. The Alt-text on the graphic in Word is lost, substituted with gibberish code.
