

Share and track PDFs online

Share PDFs

Open a PDF in Acrobat or Acrobat Reader. The sharing tools are displayed in the top-right corner of the tool bar.

All of these are missing

You can share a PDF file using any one of the following methods:

- > **Share an anonymous or public link to the file**
- > **Share the document as an email attachment**
- > **Send personalized invitations for viewing or commenting**

Recipients experience

Recipients get an email notifying them that the file is shared with them. The email contains the Open button and a link to the shared document. Clicking the link or the button opens the document in a browser. Recipients can also download the document if necessary.

See the example screenshot below showing the email notification received by a recipient.
