

# My custom date

Just sharing my custom variation on a date. Might be useful to someone.

I'm a newbie, please don't ask anything technical.

```
var fld = this.getField("Line_1_DatePicker_1");  
fld.value = util.printd("Delivery Date yyyy mmmm d dddd @ HH:MM",new Date());
```

Copy & Paste - Fig 2

("Line\_1\_DatePicker\_1") ("AnyName")

You can name the form field to anything you like

("mmmm d yyyy") = December 16 2022

You can format the date to anything you like

*Hope the form field will work on the Adobe Forum, and you get use from it*
