

After opening Acrobat, I get the below grey box with a progress circle appearing and it doesn't go away or load up.

The new version of Acrobat (23.03.20269) is now available to address this issue. Please update the application from the help menu > Check for updates and reboot the computer once.

You may also download the patch manually from the link <https://www.adobe.com/devnet-docs/acrobatetk/tools/ReleaseNotesDC/index.html> and see if that works.
