This is my second message to you and 2nd attempt to upload my fla file: Ehecatl 7 final 4 colin 210510- a short version of my 4 minute project. Exporting this scene to ME results in a qt movie that only shows my final line layer (first layer), represents animation and still drawings, and omits the second layer, finaline 2, representing keyframes of solid bg colors and a drawing. Hope this helps in figuring out what's going on. Thank you. Francisco
