# Adobe Photoshop

Create amazing images across desktop and iPad.

From photo editing and compositing to digital painting, animation, and graphic design—whatever you can imagine, you can create it in Photoshop.

## Photoshop benefits

### Retouch photos

Make portraits pop and expressions more expressive. Swap out skies in a click. Remove objects, retouch, and recolor. With powerful editing tools and new smart features for creating magical effects, you can turn imagery into artistry.

### Transform photos

With one-click selections, easy masking, and unlimited layers, you can quickly create what your camera can't capture.

### Paint and draw

Use thousands of brushes or create your own—Photoshop puts the world's largest collection at your fingertips.

### Design anything

Posters, packaging, banners, websites—graphic design starts with Photoshop. Combine photos, graphics, and text to create entirely new images. Select your subjects with a click. And play with color and effects to polish any design project.

### Create anywhere

The creative power of Photoshop is on your iPad. Open full-size PSDs, create sophisticated composites, retouch images, and control brushes with your finger or Apple Pencil. Work on desktop, iPad, even offline—all your work is synced to the cloud, so you can always pick up where you left off.

## New features

### Experiment with Neural Filters

Use simple sliders and AI technology to colorize a scene, zoom in on parts of an image, remove scratches, or change someone's expression, age, or pose in seconds.

### Easy sky replacement

Select the sky in an image and replace it with a sky of your choice. Your scenery colors will automatically match the new sky.

### Improved Learn and Help menu

Now you can find tools and see feature demos as they apply directly to your project—all without leaving the app.

### Object Selection tool

Create fast and precise selections by drawing a simple rectangle or lasso around an object. Then let Adobe Sensei do the rest.

### Pattern preview

Automatically visualize, paint, and draw perfectly repeating patterns.

### Livestream from your iPad

Now you can livestream right from your canvas and share your projects with creatives around the world.
