The first time I generated to Word, I saw the problem. Now it is working.

Link has underscore as bookmarks cannot have spaces.

"h" should not be appearing but does not seem to cause any problems.

## Cross Reference To Heading In Same Topic

See Heading Same Topic[Heading Same Topic](#)

RoboHelp allowed me to set this up but on clicking Insert the Preview text appeared and then was removed leaving the code as

```
<p>See <a data-xref="{text}" href="Fourth_Topic.htm#h"> </a></p>
```

I then typed in the missing text and that seems to have fixed that issue.

Hyperlink To Heading In This Topic

That is not an option. You have to use bookmarks.
