

ASUSTech-David01> hi
Laszlo> Hi David
ASUSTech-David01> d e o d prem?
Laszlo> [REDACTED] I am considering to use the Y connector for NOCTUA (has two fans) and connect the single end to the ASUS 'CPU-FAN' connector. My concern is: will it use the Fan Xpert? The ASUS board has a 4-pin connector, the NOCTUA has a three pin connector (the PWM is it Power Management?) will not be connected in this way.
Laszlo> It is Premium, sorry...
ASUSTech-David01> it seems unlikely]
ASUSTech-David01> the fan will spin but the monitoring will be gone
Laszlo> Should I talk with the NOCTUA guys?
ASUSTech-David01> what board do u have?
Laszlo> P6X58D Premium
ASUSTech-David01> ok
Laszlo> It has 3 cha-fans, one pwr-fan and 1 cpu-fan
Laszlo> Your manual says that all except the power one, have FAN Xpert power monitoring capability
ASUSTech-David01> checking...
Laszlo> The question is, all but the cpu-fan are 3-prong connectors. If they support Fan-expert, then the CPU-FAN should also, shouldn't it?
ASUSTech-David01> typically the monitoring portion is not available with a 3-pin header.
Laszlo> Actually, the CPU-FAN and the CHA_FAN1 are 4-prong connectors.
Laszlo> On p. 2-33 of the manual, it says: Only the CPU_FAN, CHA_FAN1, 2,3 connectors support the ASUS Fan Xpert feature
ASUSTech-David01> right that is true.
ASUSTech-David01> but the 4th pin you won't have is typically the control pin or power management
ASUSTech-David01> this is true in this case as well.
Laszlo> SO, you are saying, that the CPU_FAN 3-pin header will support the Fan Xpert feature, that is, it will control the fan speed?
ASUSTech-David01> no i am saying it won't.
ASUSTech-David01> the fan will always be on, no control.
Laszlo> DO you have any suggestion? Replace the fan, or talk with NOCTUA?
Laszlo> Sorry, fan, not fun
ASUSTech-David01> yes check with noctua, perhaps they have some other alternative.
Laszlo> ANd CHA_FAN 2 and 3 also 3-pin connectors, and they support Fan Xpet... how?
ASUSTech-David01> duno,
Laszlo> Anybody at ASUS would know it?
Laszlo> e-mail, or phone?
ASUSTech-David01> tsd@asus.com
ASUSTech-David01> email
Laszlo> Thanks.
ASUSTech-David01> it doesn't really matter in this case
ASUSTech-David01> np
