

This PDF is for verifying the Go-To-Page fuction works with your PDF viewer.

If you can click on the tabs on the right side of the page and the PDF changes to the page that the tab corosponds to, the Go-To-Page fuction works.

If you can click on the links at the bottom of the page and the PDF changes to the page that link corosponds to, the Go-To-Page fuction works.

If the Go-To-Page fuction does not read your options on page 4.

Currently I have discovered that the Go-To-Page function works with all desktop PDF software.

I can't speak of Apple iOS as I do not own any Apple devices.

Adobe Acrobat for android

Adobe Acrobat for android no longer seems to support the Go-To-Page function at the time I created this PDF.

They used to support it but for some reason since one of they last upgrades to the app, it stopped working.

Go to
Page 2

If you are an android use and need an PDF reader that supports the Go-To-Page function, there are many in the Google Play Store that are free. No all support the Go-To-Page function.

The one that I found that I use is called "Xodo".

Xodo is free and at this time and had many other functions.
